Summary

I am a Master of Science student in Urban Planning at Columbia University, expecting to graduate in May 2027. I have a Bachelor of Science degree in Architecture from the University of Michigan, where I graduated in 2023. I have completed two internships and a volunteer project in the architecture and urban planning fields, where I applied my skills in Rhinoceros, ArcGIS Pro, and LEED GA certification.

Experience

Ennead Architects
Summer Intern
August 2022 - August 2022 (1 month)
New York, United States

- Conducted research on site conditions and transportation infrastructure, gather and analyze urban data to produce maps that inform the initial phase of a downtown residential development project
- Created facade variations for a Laboratory Building, contributing to the early design stages with renderings, balancing between aesthetic considerations and practical design requirements.

The Yiddish Arts and Academics Association of North America (YAAANA)
Design Consultant
May 2022 - July 2022 (3 months)
San Diego, California, United States

- Engaged in the design of individual housing units for an immersive cultural holiday village, emphasizing culturally responsive and inviting environments that resonate with the project’s unique community values.
- Utilized rendering techniques to convey design intentions, translating the Eastern European cultural narratives into the spatial design of the housing units, and facilitating a collaborative refinement process through visual communication.

World Urban Planning Education Network （ WUPEN ）

Research Assistant

February 2021 - June 2021 (5 months)

Shanghai, China

- Developed a case study database on smart-city and urban renovation projects, providing strategic insights for urban planning initiatives.
- Analyzed website metrics and user feedback to inform future development strategies, focusing on a data-driven approach to enhancing user engagement.
- Assisted in the organization of an international planning design competition and global scholar panels, facilitating knowledge exchange and collaboration.

DFA Architect

Architecture Internship

May 2020 - July 2020 (3 months)

Shanghai, China

- Designed interior layouts for a residential project, selected furniture, and producing detailed construction drawings based on client needs and project specification
- Participated in a high-rise building competition, focusing on spatial planning and site analysis with an eye on transportation and development potential, assisting understanding of urban dynamics in architectural design.
